

# RESEARCH VESSEL POSEIDON

The Research Vessel Poseidon joins Support Vessels of Alaska, Inc. (SVA) as a powerful and versatile asset, ready to support a wide array of seafaring assignments. At 135' with a 30' beam, this steel vessel equipped with dynamic positioning (DP) represents the workhorse spirit of SVA. Following a comprehensive retrofit and outfitting process, Poseidon is now optimized to deliver exceptional service across multiple domains, including hydrographic surveys, oceanographic research, and many other marine applications.
