

RESEARCH VESSEL WOLDSTAD

YOUR VERSATILE MARITIME PARTNER

The R/V Woldstad, a formidable 121' steel vessel originally commissioned by the State of Alaska for patrolling the challenging waters of the Bering Sea and Aleutian Islands, stands as a testament to versatility and reliability. Built to endure icy conditions, the Woldstad seamlessly transitions between oceanographic research, oceanographic surveys, and housing projects, making it a valuable asset for a wide array of maritime operations.

SPECIFICATIONS

Hull

Steel (ice reinforced)

Dimensions

Length overall: 121'

Beam: 28'

Draft: 12'

Engines (2)

Engine(s): Caterpillar 3508

Engine(s) Total Power: 2,000HP
